Valve Adjustment

**Valve Adjustment -
mail.trempealeau.net**

When you are on number 1 compression stroke, you adjust the intake valves on cylinders 1, 2, and 4. Then adjust the exhaust valves 1, 3, and 5. Then rotate the engine 360 degrees and adjust the intake valves 3, 5, and 6. And the exhaust 2, 4, and 6. Let me know if you need more help.

What is the order of adjusting the valves on a cat 3406b motor

I did a valve adjustment on my 3406b my clearance seems to be way out. Does anyone have a website I can visit to give me the allowed clearance. I think they are supposed to be at .015 which is what I put them at. Across the board they were .030

3406b Cat Engine Valve Adjustment

We know it isn't a turbo, or air to air or valve lash issue so right now I'm blaming my fuel to air mixture. I know of one adjustment screw on it but recently heard there are actually 2 you need to adjust to get the right mixture and lots of power. we need all the power we can get out of this truck since our weights are so high.

valve adjustment

It was the first fully electronic motor in the series; its predecessor was the semi-electronic 3406C engine. Caterpillar released many variations of the 3406 before finishing on the 3406E. This included the 3406A, 3406B, 3406C, and finally the 3406E. The 3406A/3406B were both fully mechanical
