to establish the allowable stress values. It has been reproduced below. It is worth noting that for bolting the factor of safety the ASME provides for the tensile strength and for tensile and yield strengths for bolting with strength enhancement by heat treatment is lower than wrought product at room temperature and above.

ASME standards for materials are a critical requirement for calculating a design's safety factor. Materials allowable for use in various applications are covered by their relevant code. Section II, Part D, of the ASME BPV code. Section II, D tables 1A, 1B, and 3 provide allowable stress data for use in Section 1 (Power Boilers), Section III (Nuclear), Section VIII,
