European Best Practice Guidelines on Cargo Securing for ...

Load securing, also known as cargo securing, is the securing of cargo for transportation. According to the European Commission Transportation Department "it has been estimated that up to 25% of accidents involving trucks can be attributable to inadequate cargo securing". Cargo that is improperly secured can cause severe accidents and lead to the loss of cargo, lives, and vehicles, or cause environmental hazards.

Load securing - Wikipedia

International Guidelines on Safe Load Securing for Road Transport. Rules on safe cargo securing today vary from one country to another, making it difficult for road transport operators to know the minimum requirements for international journeys. Moreover, loads that have not been properly secured can fall off, affect the balance of a vehicle and sometimes even tip it over and cause accidents with other vehicles.
