Make Your Own Neural Network

Make your Own Neural Network makes a excellent attempt to explain a Neural Network (NN) as simply as possible. The language and tone of the book is simple and concise and it stays very focused to explaining what a NN is in the first chapter in lay English and then offers a practical working example in Python in the second chapter.

If you want to build and run your own simulated neural network and you know the Python programming language, you could probably do the same by downloading the code from Tariq's Github project webpage. On the other hand if you want a fairly deep understanding of how it all actually works, this book is very good indeed.

Make Your Own Neural Network

Neural Networks are like the workhorses of Deep learning. With enough data and computational power, they can be used to solve most of the problems in deep learning. It is very easy to use a Python or R library to create a neural network and train it on any dataset and get a great accuracy.

How to build a Neural Network from scratch

First the neural network assigned itself random weights, then trained itself using the training set. Then it considered a new situation $[1, 0, 0]$ and predicted 0.99993704 . The correct answer was 1 .
